PROFESSIONAL SUMMARY

6th-semester Bachelor of Information Technology student at Gandaki University (Expected Graduation: 2027/2028) focused on Data Science, Machine Learning, and Analytics. Hands-on experience with Python, SQL, PostgreSQL, Pandas, Scikit-learn, XGBoost, Power BI, and Streamlit. Built an end-to-end e-commerce customer intelligence solution covering data processing, exploratory analysis, RFM segmentation, predictive modeling, recommendation analysis, and interactive business intelligence. Possesses strong business intuition, quantitative problem-structuring skills, and commitment to data integrity. Seeking Data Science, Machine Learning, or Data Analytics internship opportunities.

TECHNICAL SKILLS

Programming & Data:	Python, SQL, Pandas, NumPy, Matplotlib, C, Java, PHP, JavaScript
Machine Learning:	Scikit-learn, XGBoost, Random Forest, Linear Regression, K-Means Clustering, Classification, Churn Prediction, Feature Engineering
Analytics & Statistics:	Exploratory Data Analysis (EDA), RFM Analysis, Customer Segmentation, Model Evaluation, Descriptive & Inferential Statistics, Probability, Advanced Excel
Databases & BI:	PostgreSQL, MySQL, Power BI, DAX, Streamlit
Tools:	Jupyter Notebook, Git, GitHub, VS Code, pgAdmin

FEATURED PROJECT

E-Commerce Customer Intelligence & Analytics — Python, PostgreSQL, Machine Learning, Power BI, Streamlit

- **Data Processing & EDA:** Cleaned and processed ~500,000 transactional records using Python/Pandas and PostgreSQL; engineered customer-level analytical features.
- **Customer Segmentation:** Applied RFM (Recency, Frequency, Monetary) analysis to classify customers into Champions, Loyal Customers, At Risk, and Lost segments.
- **Predictive Modeling:** Trained and evaluated Random Forest and XGBoost churn prediction models, achieving approximately 0.80 ROC-AUC.
- **Recommendation Analysis:** Built a recommendation feature using customer purchase behavior and similarity-based analysis.
- **BI & Application:** Developed Power BI dashboards and a Streamlit Customer 360 application for interactive customer insights and decision support.
- **Project Source:** GitHub repository

ADDITIONAL PROJECTS

BroCar - Online Vehicle Rental System — PHP, MySQL, JavaScript, eSewa

- Built a full-stack vehicle rental platform with booking workflows, user and vehicle management, administrative controls, and integrated eSewa online payments.

nsureinsurance.com - Live Insurance Portal — Web Development

- Developed and deployed a live user-facing insurance website, working on interface structure, content presentation, and production deployment.

EDUCATION

Bachelor of Information Technology (BIT) — Gandaki University, Pokhara, Nepal Expected Graduation: 2027/2028

Current Status: 6th Semester | Currently Enrolled

Relevant Coursework: Artificial Intelligence, Data Mining, Database Management Systems, Statistics & Probability, Data Structures & Algorithms, Software Engineering, Operating Systems, Computer Networks, Research Methodology.

EXPERIENCE

Private Academic Tutor Nepal

- Explained complex technical and mathematical concepts to individual students, strengthening communication, problem-solving, and interpersonal skills.

CAREER INTERESTS

Data Science • Machine Learning • Data Analytics • Business Intelligence • Customer Analytics • Applied AI • Fundamental Data Research
